LenMus Phonascus Crack

The LenMus Phonascus is a combination of what makes music theory fun. It lets you master your favorite songs, while improving your performance, no matter what instrument you play. Imagine no more boring theory books - LenMus Phonascus brings you the chance to learn music theory by playing and analysing songs. After listening to a song, the application displays the key signature and time signature, then it can help you figure out what kind of music it is. Want to learn the notes? You can play the song and the notes of the different instruments are highlighted in a blink. Are you struggling with reading music

notation? No problem - the application can play the song, including the timing of the notes, and the notes are highlighted. Want to study a song at your own pace? You can replay the song at a different speed for easier learning. Are you stuck? No problem - the application offers you self-grading - you can rate the performance on a scale from 1 to 5 and the application will automatically generate a song with the score you gave. What's more, it offers you a virtual musical instrument. Select the instrument and play along with the original song. See how your own playing compares to the song, and view the interpretation of your notes as well as what part of the song you played, on the instrument screen. LenMus Phonascus is a fun way to learn music theory. It

helps you understand the music and to perform better by practising and analysing real songs from the library. Features: * Learn music theory by playing and analysing songs * Learn the notes of different instruments from a library of over 1.5 million songs * Self-grading, self-teaching for success * Play along with the original songs, improve your performance * Real instruments, real songs, real learning - What could be better than this? * Tons of learning material to help you master songs you love * High-quality audio recordings of all songs * A virtual music instrument Instructions: * Choose an instrument * Choose a song to learn * Listen to the song, then follow the steps * Each step is explained by a musical note * Make sure you hear the notes

before pressing the buttons * Repeat as many times as necessary * Keep working at it - you'll get it LenMus Phonascus Powered by DriveHQ, LenMus Phonascus is a new application that allows you to enhance your music theory
