Windows Configurator Crack+ 2022 [New]

Windows Configurator is a practical and reliable application worth having when you need to tweak your system in an intuitive way. By using Windows Configurator you have the possibility to disable specific options from your system such as 'Shut Down', 'Log Off' or 'Run', hide specific drives and protect them from unauthorized access, as well as to customize your Windows Explorer. The previously mentioned application comes with an intuitive interface and with well organized menus. In the upper menu of the utility, you have the possibility to navigate through tabs and set your favorite options effortlessly. Windows Configurator provides you with various system tweak options which are sorted in different categories ranging from icons, Start menu and Control Panel options to Windows Explorer, Network settings and more. With the help of Windows Configurator you are able to uninstall programs or delete their entries from registry, restrict multiple 'Control Panel' items, run only files with extensions specified by system administrator, or change the desktop appearance and behaviour. What's more is that you can even disable the close button on the logon dialog box where users will have to provide a valid login and password to gain access to the local machine. In order to perform this action, you need to set your machine to be part of a Windows domain as the user must be authenticated by the network. From the right panel of the application, you can preview the total number of tweaks, as well as to save the settings as profiles for later use or export them to other machines. The application runs without over-blocking, slowing the PC down or conflicting with other software installed on your computer. Thanks to its simple and intuitive layout, Windows Configurator should please all types of users when it comes to tweak their system. Windows Configurator Features: * Disables program's control panel items, option to hide drives from the map, hide drives from the context menu, show drive icons from the desktop or from the folder views of Windows Explorer. * Configure the Windows Explorer's options such as open new folder, open in new window, show file properties dialog, desktop view, hide specific folders and drives from the file-tree or from the folder view. * Remove programs such as games, browsers, utilities, etc from the Windows OS. * Automatically hide the tray menu and Show at startup. * Hide the start button. * Open control panel with a single click on the desktop. * Configure the keyboard settings (Windows Key, Alt, and Ctrl). * Configure the Windows Look and Feel. * Set the working directory of
