I have created a USB containing v2.26 of Fun-zip. This is a 64bit update to my work of the same name on Microsoft's Windows platform. You can view some screen shots here. Here is a list of changes since v2.25: 1. Fix buffering problems when fast loading (eg. when transferring multiple files). 2. Fix crash when launching on FAT32 systems which have spare sectors. 3. Fixed bug in "find files" that caused it to report many different, often empty, files. 4. Minor bug fixes. 5. Updated the documentation and readme.txt. 6. Added experimental 32bit version, for embedded systems which have a very low memory limit. There is no artificial limitation on the number of files to be transferred. Many of the windows messages to the application (about the amount of free space, how to stop, how to start) are listed in the output log to help you set the program's behaviour correctly. Fun-zip v2.26 ----- v2.26 is a 64bit update to the v2.25 release, released 18th Sept 2001. Update information: - not compatible with Windows ME. - incompatible with Windows 2000. Please save your work when exiting Fun-zip (also known as Fun-zip XP). Fun-zip was written by Tommy Svarstad from the University of Oslo in Norway. You can also try downloading the source code from the Fun-zip website. The web site address is That's the
