One big difference, however, is that this is the first FIFA since 2014 to feature a new gameplay engine, one that feels more realistic, more authentic and more fluid. "Bringing the player into the game has never been more important," says Michael Eales, Executive Producer at EA Canada. "It's why we've built a generation of soccer fans over the years. The most important part of creating the best football experience is getting the game's core understanding of the sport right." Changes are Coming to FIFA It's been a few years since EA Sports last updated their flagship football simulation title, and this year, fans are in for a lot more than just a freshened-up engine. FIFA 22 introduces a host of new innovations, including: Player Intelligence. Six new player traits and fitness mechanics have been added to the core gameplay: Pass, Long, Aggressive, Counter, Interact and Creative. These traits will help your players make the right decisions on the pitch. Health and fatigue are back, offering a more authentic experience of getting knocked off your feet, falling and getting up again. Traits and fitness mechanics can lead to crucial moments in games and in real-life, such as a long pass leading to a set piece goal or a brilliantly taken free kick. New AI. EA SPORTS FIFA 22's AI (artificial intelligence) has had a more mature look and feel in recent years. This year, the referees also have a more polished, human look. The referees will take control when an offence occurs on the pitch, and their reactions will be more natural and realistic. New Approach to Attack and Defense.
