More particularly, the present invention relates to a semiconductor device including a trench capacitor and a method of manufacturing the same. 2. Description of the Related Art As the electronics industry progresses, the market's demand for miniaturized semiconductor devices and system-on-chip solutions keeps growing. In order to satisfy the demands, a further decrease in the size of transistors which form functional circuit patterns of the semiconductor devices is necessary. A size of a trench capacitor used for a dynamic random access memory (DRAM), which is one type of semiconductor device, is related to a size of a memory cell. In particular, when a cell size of the DRAM is decreased, a resistance between source/drain regions of the cell transistor and a bottom electrode of the trench capacitor is increased. I hope you'll stay with me for the following few updates. I've been busy applying to jobs and researching farms, so here's my first blog. I found a farm in west central Missouri that has been passed on to its founders' children by the original owners. I've never worked with cattle, and this is my first time working with a mule. I just received my uniform today, and I can't wait to get on the job. I finally wore the uniform I've been looking at for over a month now. It's so exciting that finally I can wear a Uniform!
