#### What's new in Baseball Adventure:

**Baseball Adventure (or, more formally, Baseball Adventure for Atari 2600 by Automated Simulations, Inc. ASI) is a sports simulation video game. It is the first game designed for the Atari 2600 and the first game published by Atari, Inc. It is of a tower defense nature and makes heavy use of animated sprites. It was the first game to enter the public domain, and was intended to be the official release title for the 2600 before Atari released the game known as Computer Baseball for the Atari 2600 game system. History ASI's first game, Baseball Adventure was a first person perspective (1PP) game, with the pitcher being pitched so the player could see a three dimensional form in front of the pitched plate. The player had the ability to slow down the ball movement to hit specific spots, and line up the swing. He also had the ability to pitch at the batter to affect where he swings. This feature of the game was similar to Rock 'n' Roll Hockey and Computer Baseball, but it was the first arcade-style baseball game to grace the Atari 2600. The game was first exhibited at the 1975 Winter Consumer Electronics Show. Atari acquired all rights and distribution to the game during the show, though a released version would not become available for another two years. The PAL version of this game was released in May 1977, and few games were able to ever get a PAL release due to various reasons such as no chips. It is the only official Atari 2600 game not to have been released outside of North America, the PAL version being the only one released. In 1977, ASI designed Bases Loaded, which was the very first 2PP game for the 2600, taking advantage of the double scanline. Bases Loaded was the first game to model hitting, pitching, and baserunning (running between bases), that would be considered text-based action in baseball. It was also the first baseball game to use 3D graphics. This would mark the first appearance of the very first arcade baseball game on a home video game console. Bases Loaded was regarded as one of ASI's best games and was included in 2600/5200/8515/8500/8200/1021/3021/4021/5120/5121/5122/5123/7080/7081/3081/7091/7000/5000 [citation needed] (it was also included in the 5120's greek version)**
