I am using a pi-hole on an RPi and I'm trying to figure out how to route the USB port to the HDMI port. I don't want this to end up on my TV. I tried this hackery: A: I have done this with my Raspberry Pi B+. It does not work and no, you cannot just connect the USB to the HDMI port. HDMI is a DisplayPort interface. In order to achieve this you would have to have a completely different USB cable than a standard USB-A -> MiniB-to-A that connects the Raspberry Pi to your television. If it is not already connected to a USB interface there is no way to connect it to the HDMI port. they would defend the Americas in war." *_Burning Ambitions_*, 146. 8. I tried already: First i tried the downloaded file in a Win7 machine, and it worked. Then, i tried in an old WinXP machine with an older Nero version (7.3.2350, i think), without luck. Is there something else to be checked? A: If

you're looking for a standalone installer, there are the standalone executables at the Nero.com download page: Nero Burning ROM 2017 17.0.9 Nero Burning ROM 2016 17.0.9000 Nero Burning ROM 2019 20.1.0 Nero Burning ROM 2020 20.1.0 If you don't want to keep the executables just for one run and want to have the same-sized versions on all PC's, have a look at the portable installers. Nero Portable Setup 17.0.9000 Nero Portable Setup 2016 17.0.9000 Nero Portable Setup 2019 20.1.0 Nero Portable Setup 2020 20.1.0 If you have a Linux machine, I'd recommend installing Nero on that. It's a much better supported OS. Q: Extra record in query I'm currently recording a song. It records something twice. I'm using this code to do that.

```
private void
wibit_Click(object sender, EventArgs e) { int
max = 0; max = Convert.ToInt32(wibit.Text);
string r = record.ToString(); r = r.Replace("
", "+"); if (int.TryParse(r, out int i)) { while (i
> max) { i--; } song.RecordWav(i.ToString());
} Message
