Epson Stylus SX .Alternative suppliers and alternative providers: infrastructure for health care. The use of alternative providers has grown rapidly in recent years. Because of the recent changes in the U.S. health care system, these providers are becoming more widely accepted. A number of factors, including the introduction of managed care, have contributed to the use of alternative providers. A thorough understanding of alternative providers will enable hospitals and health care organizations to manage the transition of patients to the outside and to use alternative providers effectively. The first step is to determine whether alternative providers are of appropriate quality for an institution's population. Factors such as the relative cost of alternative providers and their accessibility to patients must be considered. In addition, the quality of care, as measured by services provided, quality of supervision, and patient satisfaction, must be established. This article offers strategies for assessing and improving alternative care, including risk management, to enable health care providers to make sound choices about their use.
